Sodium DNA, 7-Layer Hyaluronic Acid, Beta-Glucan, Betaine, Hydrolyzed Collagen, Panthenol, Vitamin E (Tocopheryl Acetate)

PDRN (sodium DNA), which helps improve wrinkles by making cells healthy through collagen synthesis in the dermal tissue, an ingredient that forms a skin protective film and is effective in improving wrinkles, and an ingredient that protects the skin from harmful oxygen that causes aging help increase skin elasticity even after washing.

It contains Dipotassium Glycyrrhizate, which has anti-inflammatory effects and is useful in soothing irritated skin, which can be especially helpful for those with sensitive or prone skin to redness after washing.

7-layer hyaluronic acid, which contains 300~1,000 times its weight in moisture, increases moisture in dry skin and helps keep the skin moisturized.

Citric acid, which is mainly used as a pH adjuster that neutralizes alkaline substances in cosmetics and adjusts acidity, is a so-called AHA ingredient such as glycolic acid, lactic acid, and citric acid, and is an ingredient that is highly effective in cleaning the inside of pores.

The acidic ingredient contained in citric acid has a soothing effect on the skin by acting on skin itchiness and inflammation. For this reason, it is widely used in mildly acidic products (cleansing, skin care), etc. used for oily skin that produces excessive sebum, or skin with a rapid turnover of dead skin cells.
